

simply

Smart and structured

This office furniture range aptly named Simply has been designed and developed to cater for space efficiency, ergonomics, staff productivity and health within the paradigm shift caused by the introduction of flat screen computer technology.

The Simply range of furniture is manufactured using a support beam based leg system with an additional architectural beam for supporting reticulation trays, screening and 3rd level accessories.

A wide variety of space planning footprints are now available, and are supported by a user-friendly range of storage units to enhance the aesthetics, ergonomics, churnability and investment factors that Simply offers.
